KARMA-AV BRINGS SVS 3000 SERIES SUBS TO THE UK

More compact than their stellar 4000 series range-mates, two new models deliver signature SVS performance and value from smaller footprints...

Karma-AV is proud to announce the UK availability of the SVS 3000 Series subwoofers, which promise to deliver the brand's signature bass quality and dynamics from smaller cabinets. Featuring an all-new 13-inch high-excursion SVS driver powered by 800W RMS of MOSFET amplification and tuned using Analog Devices audio DSP through an innovative SVS smartphone app, the new SB (Sealed Box) and PB (Ported Box) models will offer bass lovers subterranean frequencies and easy, accurate room control from a wider range of room locations.

Powering the 3000 Series is a sophisticated Sledge STA-800D2 amplifier, which combines the high current output of discrete MOSFETs with Class D efficiency. Capable of an impressive 800W RMS (2,500W peak), the STA-800D2 will support exceptionally dynamic driver excursions while maintaining precise control for effortless clean bass reproduction at reference levels. Governing the output is a 50 MHz Analog Devices Audio DSP with 56bit filtering - the most sophisticated ever used in a home subwoofer - designed with multiple parameter adjustments to achieve the ideal in-room response.

The 13-inch 3000 Series' drivers are entirely new designs combining proprietary features including a massive dual-ferrite magnet motor assembly weighing over 11kg, edge-wound voice coils, lightweight and rigid aluminium venter cones, and a long-throw parabolic driver surround built for extreme excursion, SPLs and longevity.

Convenient control is possible via the SVS subwoofer DSP smartphone app for Apple, Android and Amazon devices. Launched with the flagship SVS 16-Ultra subwoofers, the SVS app offers an easy way to control volume, adjust crossover frequencies, calibrate a three-band parametric EQ, set polarity, access multiple DSP functions and program custom presets for the one-touch tuning of music, movies, gaming sources. Advanced customisation allows for subwoofer naming, standby mode selection and system resetting. Bluetooth connectivity delivers full system access - even when the subwoofer is out of sight - while bi-directional feedback shows adjustments in real time on both the app and rear panel interface.

The 3000 Series models are equipped with a double-thick MDF front baffle and rigid internal bracing to support the drive unit and to ensure an acoustically inert environment.

SB-3000: Sealed Cabinet Subwoofer

Front-firing 13 inch high-excursion SVS driver

Rear-mounted 800 watts RMS (2500+ watts peak) amplifier with Intelligent Control Interface (ICI)

Freq. Response: 18-270Hz ± 3 dB

Premium Black Ash and Piano Gloss Black finish options

Protective non-resonant steel mesh grille

Dimensions (w/ grille) H x W x D mm: 397 x 385 x 451

Weight (unboxed): 24.7 kg

PB-3000: Ported Cabinet Subwoofer

Front-firing 13 inch high-excursion SVS driver

Rear-mounted 800 watts RMS (2500+ watts peak) amplifier with Intelligent Control Interface (ICI)

Freq. Response: 16-260 Hz ± 3 dB (standard mode); 18-260 Hz ± 3 dB (sealed mode)

Dual 3.5-inch ports

Premium Black Ash finish

Protective non-resonant steel mesh grille

Dimensions (w/ grille) H x W x D mm: 557 x 465 x 660

Weight (unboxed): 37.3 kg

SVS 3000 Series subwoofers:

Typical retail prices (inc VAT)

SB-3000 (Black Ash): £1,275.00

SB-3000 (Black Gloss): £1,349.00

PB-3000 (Black Ash): £1,549.00

Availability: January 2019

About SVS

SVSound was founded in 1998 by a group of audio enthusiasts seeking to bring performance improvements and enhanced value to the subwoofer market. By leveraging advanced technology using the highest quality components, and rigorous engineering, the team at SVS has created a line of premium audio products which bring music and movies to life with stunning realism - all at truly affordable prices. www.svsound.com
