Prime Wireless Speakers

Equipped with both WiFi/Bluetooth connectivity and smartphone/device control, the SVS Prime Wireless Speaker System is a high quality smart active/passive speaker pair that offers dynamic full-range sound and true stereo separation from online music services and local sources. Powerful 200 Watts (50 watts x 4) amplification, a high-resolution 192KHz/24-bit DAC and a precisely tuned digital crossover combine with easy control to deliver a compact and convenient multi-source, high-fidelity playback platform to all music lovers.

Control is via smart device over WiFi through the DTS Play-Fi app, direct over WiFi from preset via the front panel display or through Amazon Alexa. In addition, optical and line level inputs allow the Prime Wireless system to boost the audio experience of PC/NAS based music files, TVs and gaming consoles.

The Play-Fi app provides access to music streaming services and playlists, Internet radio and local storage from any smartphone or tablet as well as the ability to control audio from as many as 32 compatible products across 16 zones. For the most discerning audiophiles, the platform features a "Critical Listening Mode" designed for high resolution 24bit/192kHz playback.

Available in a piano gloss black finish, the SVS Prime Wireless Speaker System also offers a standard subwoofer line output, while a USB port accepts SVS's SoundPath Wireless Audio Adaptor for wireless sub connection. The USB port can also be used for charging mobile devices.

Prime Wireless SoundBase

Add high-resolution wireless audio streaming, future-facing connectivity and smart speaker control to existing loudspeakers and systems through the Prime Wireless SoundBase wireless bridge. The Prime Wireless SoundBase is DTS Play-Fi enabled for multi-room/multi-zone wireless audio streaming and control from any smartphone/tablet. A line level output also allows the Prime Wireless SoundBase to operate as a wireless streaming source for any two-channel or home theatre system.

Prime Wireless System features

High-Resolution 192KHz/24-bit DACs

WiFi, Bluetooth, and Direct Connections

Stream Spotify, Pandora, SiriusXM, Amazon Music, Tidal

Amazon Alexa smart compatibility for voice control of music

Bluetooth with aptX and AAC

Optical and line level inputs from TVs, gaming consoles, CD players, turntables, PCs and more

6 front panel presets for direct WiFi access to music services and playlists without needing a smart device
