Tivoli Audio™

Tivoli's effortlessly portable Andiamo audio system

Compact Bluetooth speaker is the perfect travel companion for music lovers on the move...

The Andiamo is the first model from Tivoli Go, a collection of portable Bluetooth-enabled audio systems designed for easy access to music when on the move. Wrapped in a premium Italian leather strap and carry handle, the beautifully compact Andiamo uses easy, high-speed Bluetooth 3.0 pairing to transform audio files and streams from any smartphone into fabulous full-range music.

Press Contact: Keith Haddock, 07767 684562, keith@keithhaddock.com

Within its durable aluminium cabinet complete with perforated speaker grille, a custom 2.5" full-range driver and coaxially aligned 3" passive radiator are driven by an ultra-efficient 20W amplifier, which is governed by advanced 24bit DSP EQ to generate detailed audio dynamics on a scale that belies the Andiamo's bijou dimensions.

A re-chargeable lithium battery designed to exploit Bluetooth 3.0's enhanced power control provides up to 20 hours of playtime. There's also a 3.5mm mini-jack for analogue sources. To complete the minimalist styling, and for enhanced tactility, push-controls over power, volume and Bluetooth pairing are embossed on the leather strap and activate sensors beneath.

Features

- Durable aluminium cabinet with a perforated speaker grill
- Italian leather strap and carry handle
- Leather embossed control buttons
- 20W system with 24-bit DSP EQ
- Simple Bluetooth 3.0 pairing
- 7.2V, 2600mAh Lithium-Ion rechargeable battery
